TAKE A LOOK INTO
THE FUTURE
of
eHEALTH

What is Vitaly ?

The ultimate goal of Vitaly eHealth platform is to engage users to improve health care. In its essence it is a secure, user friendly web-based platform, designed to allow individuals and stakeholders to become more involved in the health care process.

We take care about security

Enterprise-class security & IT controls to keep healthcare data safe with using Strong Authentication, Access Management, Data protection, Consent management and Quality management security guidlines.

What is the value we bring to our customers?

Digitalisation of healthcare

- Effective coordination and communication between patients and professionals
- Improved positioning of the institution (acquisition & retention)

Improvement of business processes

- Increased compliance and governance when scaling the service
- Improving quality and delivering more efficient care

Benefits from digitally enabled customer journeys

- Citizens are more engaged with their care
- Supports new models of care and improved care pathways

What makes Vitaly unique?

User-centered care

Intuitive interface enables patients and healthcare professionals a secure access to relevant data when and where it is needed.

Interoperability

Vitaly manages relevant clinical data from various healthcare information systems in a standardised form (HL7, IHE, FHIR, DICOM).

Modularity feat. scalability

Supported by portal technology, Vitaly eHealth Platform enables flexibility during project roll-out and maintenance.

Optimal user experience

Using responsive design, Vitaly offers optimal user experience when applied on devices like smartphones, tablets and PCs.

External services

Vitaly eHealth Platform enables integrations with external services such as consent sharing, eligibility check, identity validation, appointment booking, video collaboration solutions and/or call centers and other.
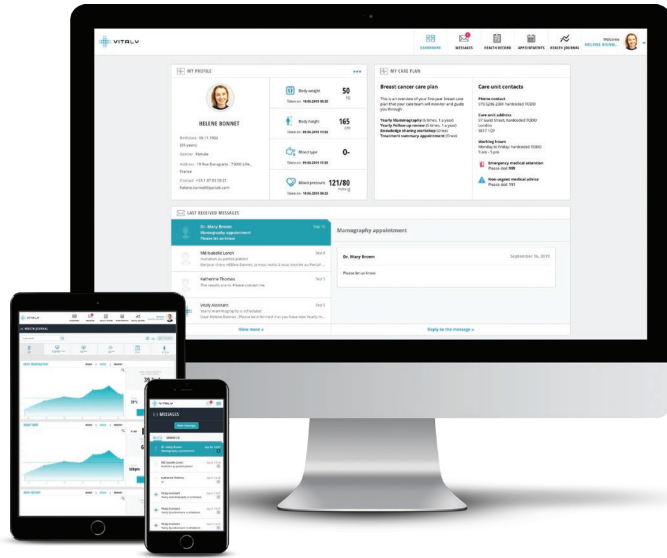

Vitaly solutions

VITALY

Patient

Elevating patient experience across the care continuum.

Vitaly Patient is an interoperable web-application that empowers the patients with a tool for 24/7 self-care management and offers them and others in need to access healthcare services a greater comfort of communicating with healthcare service providers. Using Vitaly Patient, it can also save patients' time and support the outpatient care between ambulatory or hospital visits more efficiently.

People involved:

PATIENT

DOCTOR

HOSPITAL ADMINISTRATION

HOSPITAL OR SURGERY CENTER

HEALTH SERVICE ORGANISERS

How can you benefit from Vitaly Patient?

✓ Increased patient experience & satisfaction.

✓ Less unnecessary ambulatory visits.

✓ Simplified complexity of administrative processes.

✓ Lower cost of healthcare services.

✓ Reduced risk for false treatments and medication errors.

Features that enable efficient outpatient care:
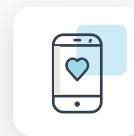

Access to Personal Health Record

List of doctors

Video consultation

Digital questionnaires
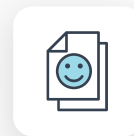

Health Journal

Appointment management
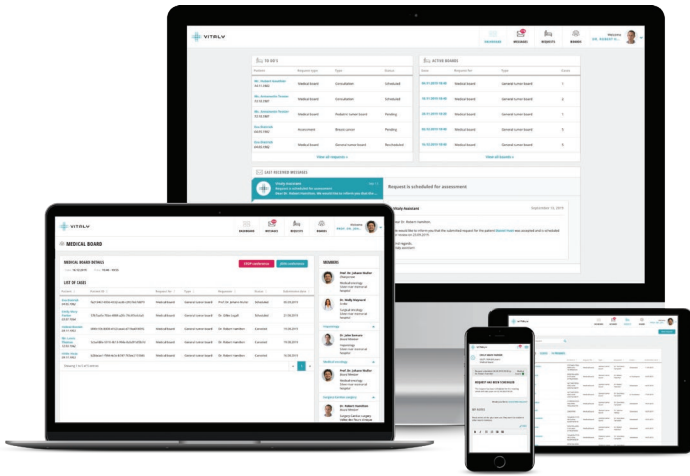

Notifications & messages

E-Consent

Educational materials

Motivational instructions
